

IPGA MEDIA COVERAGE REPORT 2023

Greetings from India Pulses and Grains Association (IPGA), the apex body for India's pulses and grains industry. IPGA has a global network of over 10,000 stakeholders spanning across farming, processing, warehousing, retail chains and import-export across the entire value chain. IPGA's vision is to make Indian pulses and grains industry & trade globally competitive; and in so doing, help advance India's food and nutrition security. IPGA takes the onus of essaying a leadership role in the domestic agri-business and play a more proactive role in the global domain to foster healthy relations among Indian market participants and between India and all associates overseas. As the apex body of the India's pulses and grains industry, IPGA constantly strives to bring together all stakeholders along the value chain so as to evolve holistic solutions aimed at strengthening the sector.

Pulses prices may soften on improved supplies

PREMIUM

Prices of pulses are likely to witness a softening trend in the new year with harvest of key varieties such as tur and urad and the imports including the yellow peas set to boost the domestic supplies. This is even as the chana crop for 2023-24 rabi season may see a decline of 10-15 per cent over the previous year's output mainly on drop in acreage, according to the trade.

Consumption of Arhar Dal down 15-20%

Synopsis

Consumers substituted tur dal with imported green lentils in homes in southern and eastern India, while in the northern and the western regions, tur dal was substituted with lentils in institutional consumption, said experts. Consumption of chana dal, which is being promoted by the central government as healthy alternative to tur dal, also increased in vegetarian meals, they said.

Consumption of tur or arhar dal has fallen 15-20% year-on-year in 2023 as retail prices have increased to ₹200 per kg from ₹130-140 per kg last year, said industry executives.

Harvesting Success: India's Lentil Bounty Blooms Amidst Favorable Conditions

Kedia Advisory · Commodities News · 2023-12-19 03:45

India's lentil production is set to surge in the current crop year, with expectations of a 5-10% increase in yield, driven by excellent weather conditions in key states. Despite a slightly lower acreage, projections by the India Pulse and Grains Association point to a potential harvest of 16.5-17 lakh tonnes, signaling a robust agricultural season. Government initiatives, including a raised Minimum Support Price (MSP), further boost the sector, with authorities stockpiling 6.5 lakh tonnes. Although lentil imports have crossed a million tonnes, the market remains stable, offering a positive outlook for both farmers and consumers.

Highlights

Expected Increase in Lentil Production: Despite a slightly lower acreage compared to the previous year until mid-December, India's lentil (masur) production for the crop year (July 2023-June 2024) is expected to increase. Favourable weather conditions in key producing states like Madhya Pradesh and Uttar Pradesh are likely to result in higher yields.

Projections by India Pulse and Grains Association (IPGA): IPGA anticipates that the upcoming domestic masur crop could reach 16.5-17 lakh tonnes, surpassing the previous year's production of 15.5 lakh tonnes. The crucial period for plant growth and yield potential is seen in December-January, dependent on soil moisture availability.

Crop Conditions and Yield Expectations: Crop conditions in most growing areas are reported to be good. Manek Gupta, Managing Director of Viterra India Pvt Ltd, suggests that lentil yields may be higher, with a potential increase in crop by 5-10% compared to the previous year. The estimated acreage for the current year is around 18.5-19 lakh hectares.

Trade bodies sign MoU to foster Indo-Brazilian bilateral pulses trade

As part of the MoU, both countries will take steps to foster the development of international trade between India and Brazil

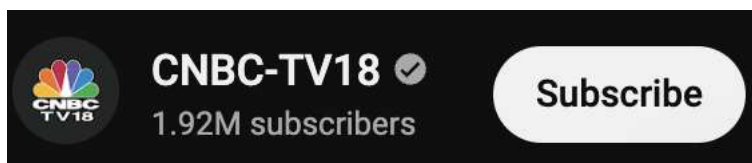

[BY BL BENGALURU BUREAU](#)

IPGA and IBRAFE shall work towards promoting pigeon peas (tur) and black matpe (urad) and any other pulses crop of mutual interest

The India Pulses and Grains Association (IPGA) and IBRAFE, Brazil, have signed a MoU at the recently held sixth edition of the Pulses Conclave in Mumbai to establish co-operative actions to contribute to the food security of both countries. IBRAFE is the Brazilian Institute of Beans, Pulses and Special Crops. As part of the MoU, both countries will take steps to foster the development of international trade between India and Brazil. The said MoU lays emphasis on market intelligence, food security, quality standards, trade promotion, technology transfer,

India pigeon pea imports from top supplier Mozambique delayed, lifting prices

November 08, 2023 — 12:41 am EST

Written by [Rajendra Jadhav](#) for Reuters →

By Rajendra Jadhav

MUMBAI, Nov 8 (Reuters) - At least 150,000 metric tons of pigeon peas bound for India are held up at ports in Mozambique awaiting export permission from customs despite multiple requests from sellers over the past few weeks, five industry officials said on Wednesday.

The delay in shipments has pushed up prices of the protein-rich staple, known in India as arhar or tur, used to make daal curry in the peak-consumption festive season.

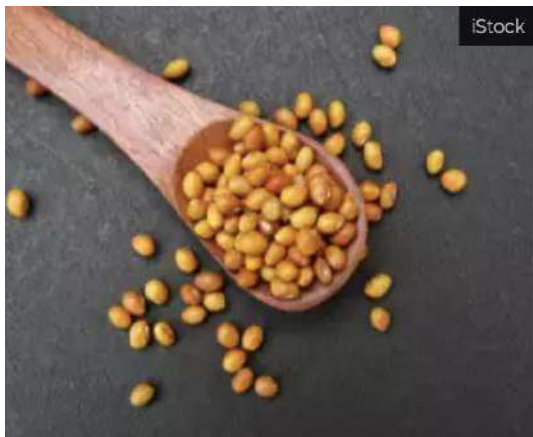

"Stocks are currently held in port-based warehouses and sellers are incurring huge storage and re-fumigation costs," said Suhas Chougule, managing director at MozGrain Lda, a local subsidiary of Ma'aden Saudi Arabia, based at Beira, Mozambique.

"Despite having all the necessary export documents per law, our 200 containers are stuck. The customs office in Mozambique is not granting permission nor are they giving any reason."

Synopsis

India, the world's biggest producer and consumer of pigeon peas, relies on imports during the final quarter of the year before the new crop harvest in January. Over half of India's imports of pigeon peas are sourced from Mozambique.

At least 150,000 metric tons of pigeon peas bound for India are held up at ports in **Mozambique** awaiting **export** permission from customs despite multiple requests from sellers over the past few weeks, five industry officials said on Wednesday.

India, the world's biggest producer and consumer of pigeon peas, relies on **imports** during the final quarter of the year before the new **crop harvest** in January.

Toor Dal Price: 2 लाख टन तूर दाल आयात का समझौता खटाई में, क्या अरहर दाल की कीमत और बढ़ेगी?

तूर दाल सबसे महंगी है और इसकी कीमत 150-160 रुपये प्रति किलोग्राम के आसपास है. खुदरा बाजारों में दाल की ऊंची कीमतों का मुख्य कारण इसकी उपलब्धता सामान्य से कम होना है. इस बीच दक्षिण अफ्रीकी देश मोजांबिक से 2 लाख टन तूर दाल आयात का समझौता खटाई में पड़ गया है. दरअसल, सरकार ही मोजांबिक से दाल आयात समझौते को रद्द करने का विचार बना रही है.

Govt may revoke Tur dal MoU with Mozambique

Synopsis

The Indian government is considering revoking the Memorandum of Understanding (MoU) with Mozambique for importing 200,000 tonnes of tur dal due to irregularities and corruption issues within Mozambique. The supply of tur from Mozambique has been inconsistent, prompting the Indian Pulses and Grains Association to seek assistance from the Prime Minister's Office.

The government may revoke the Memorandum of Understanding (MoU) that it had with [Mozambique](#) for import of 200,000 tonnes of [tur dal](#), after the industry raised the issue with the [Prime Minister's](#) office.

“The supply of tur from Mozambique is not steady yet as they are grappling with some corruption issues within their own country,” said a senior official who did not want to be named.

Pulses Supply Shortage Expected to Persist Until Diwali

October 3, 2023

In the lead-up to the Diwali festival, India is poised to grapple with ongoing constraints in pulses supply, according to experts at a recent webinar organized by the Indian Pulses and Grains Association (IPGA). The situation has been exacerbated by multiple factors, including a lower-than-expected production of kharif moong, damage to urad crop quality due to September rainfall, and an anticipated shortage of 1 million tonnes of tur until new crops arrive in December/January.

Despite measures taken by the government to cap pulse prices, such as the recent reduction in stock holding limits for wholesale traders, the supply remains tight. Wholesale prices have witnessed a 2% to 4% decline following the 75% reduction in stock holding limits, but this move has also posed challenges for organized retailers like Reliance Retail in managing their inventories.

Dilip Mohanty, Senior VP of Reliance Retail, expressed their concerns, stating that their daily pulse requirement far exceeds the new stock limit of 50 tonnes. Organized retail chains with a substantial presence across the country are finding it difficult to operate within these restrictions and plan to approach the government with their concerns.

Transporting pulses from production centers concentrated in a few states to other parts of the country has become a daunting task for millers and processors. Nitin Kalantry, a pulses processor from Maharashtra, highlighted the logistics challenges, including the need to purchase different qualities of the same dal, often exceeding the truck capacity of 25-30 tonnes, which aligns with the new stock

Tur, chana prices fall 4% on rising imports, government actions, fall in demand

Synopsis

The prices of pulses in India have decreased by about 4% in the past month due to increased imports and reduced consumer demand. The price of tur/arhar dal has declined by 4% due to stock limits imposed by the government, while chana dal prices have also fallen by 4% as a result of increased supply and competitive tenders. However, industry executives believe that prices may increase during the festival season. In contrast, tomato prices have significantly dropped, with prices in wholesale markets ranging from Rs 3-6/kg.

Tur dal

Pune: Increased **imports** of arhar/tur from Africa and masoor from Canada, and the **government's** strict action on stock limits and aggressive selling of **chana**, along with reduced consumer **demand** amid high prices, have brought down prices of pulses by about 4% in one month.

No customs duty on Masur from US

Synopsis

India had announced it would remove retaliatory duties on certain US products, including masur, during Prime Minister Narendra Modi's visit to the US in June. Customs duty of 22% on masur of US origin was made zero effective September 6. This will ease the import of masur directly from the US, instead of being routed via Canada.

India is trying to increase supplies through imports and by keeping close watch on domestic stockpiles amid shortages of different pulses due to lower production in the previous year.

The government, which is looking to step up the supply of pulses from all possible sources, has abolished **customs duty** on US-origin **masur** a day before the arrival of US President **Joe Biden** for the **G20 summit**.

The government has also made it mandatory for local stocks of masur to be reported weekly to quell attempts at cartelisation and manipulation aimed

at restricting supplies.

India's imports of lentils (masur) are set to rise this year on higher consumption as the production of other key pulses such as tur, moong and urad is seen lower on erratic weather. Based on the current import trend, the trade estimates India's lentils purchases would rise by over a million tonnes this financial year over previous year's 8.58 lakh tonnes.

"Masur imports from April till now have already crossed half a million tonne mark. Another 1.5-2lt are on the way. We expect the masur imports to cross over a million tonnes this financial year," said Bimal Kothari, Chairman, India Pulses and Grains Association (IPGA) the apex trade body.

India's production of lentils during 2022-23 stood at over 15.8 lt, per third advance estimates released in May, higher than previous year's 12.69 lt. Lentil imports, which touched a high of 11.16 lt in 2020-21, had dropped to 6.67 lt during 2021-22 and are seen rebounding.

Pulses supplies to remain constrained till Diwali

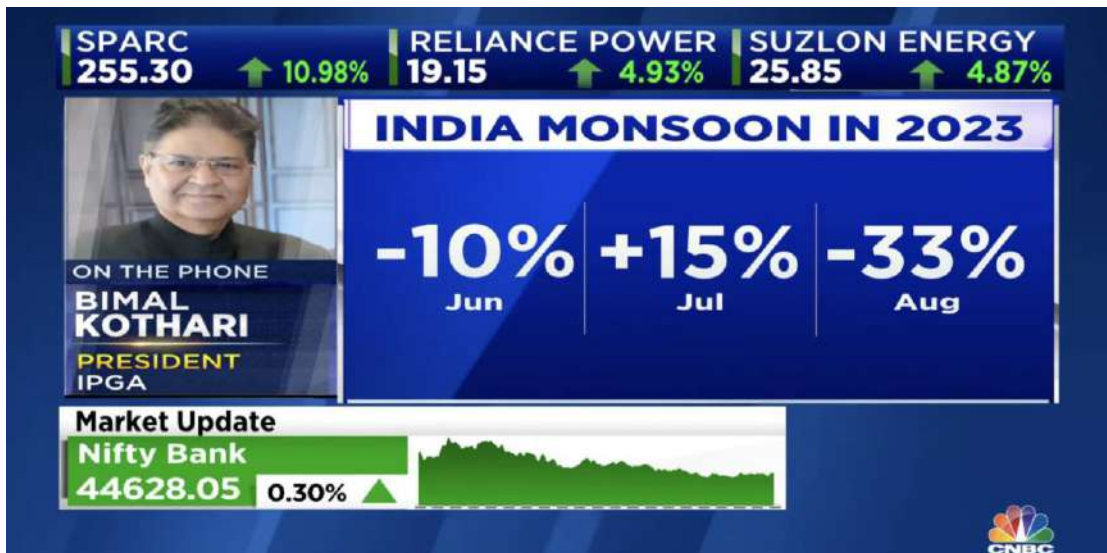

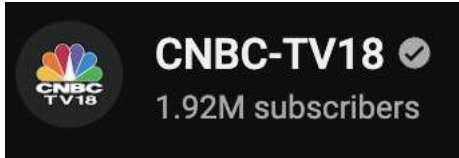

Synopsis

There is likely to be a shortage of 1 million tonnes of tur till the harvest of new crops begins in December/January, while the production of kharif moong is expected to be lower by 12%. The quality of urad crop under harvest has been damaged due to rainfall in September.

Government measures could cap the price rise of pulses though trade and industry experts expect the supply situation to remain tight till Diwali. The 75% reduction in stock holding limit for wholesale traders announced on Tuesday has seen wholesale prices falling 2% to 4%. However, it has also made it tough for the organised retailers like Reliance Retail to manage their inventories.

Australia, Brazil to grow Arhar dal for India consumers

Synopsis

Satish Upadhyay, executive committee member, IPGA, said, "Australia had earlier done trial production in 2019 and the quality was good. However, it could not go ahead as the prices in India were not remunerative for them. Now they have again started work to grow pigeon pea for the Indian market." The sources, however, said that for the initiative to succeed, the Australian counterparts may like to get assured orders from the Indian government.

Farmers in [Australia](#) and [Brazil](#) are set to experiment with growing [arhar \(pigeon peas\)](#) for consumers in [India](#), where demand for the popular yellow lentil--the main ingredient of 'dal tadka' and 'sambhar'--has been outpacing domestic production for some years now.

Ahmedabad, June 30 (IANS) Gujarat is impacted by the pulses price surge. According to the latest market rates, the average wholesale price of arhar (tur/red gram) in Gujarat stands at Rs 8,335 per quintal (as on Friday). The retail price is even higher, reaching Rs 169 per kg.

As Myanmar trade holds back tur, India warns of looking at G2G deal PREMIUM

Updated - May 10, 2023 at 09:07 PM | Bengaluru

Trade association of neighbouring nation denies hoarding, assures to augment supplies

BY VISHWANATH KULKARNI

The imports of tur and urad are kept open till March 2024 to boost the supplies as the domestic output of these pulses was impacted due to erratic weather pattern

Amid talk of hoarding of pulses such as tur (pigeon pea) and urad (black matpe) by the private trade in Myanmar, India on Wednesday warned the exporters in the neighbouring country that it may look at importing these items on a government-to-government (G2G) basis if supplies are not eased. It is understood that the exporters of these pulses from Myanmar, a large supplier, are taking advantage of the scarcity in India, which has led to a firm price trend in recent months.

India unlikely to permit import of yellow peas

hi PREMIUM

Updated - April 21, 2023 at 07:38 PM. | Bengaluru

The government doesn't want gram growers who have produced a record crop to be hit by the move

Allowing yellow peas import will further put pressure on chana and it is something the government does not want

The Indian government is unlikely to allow the import of yellow peas in view of a record high chana (gram) crop, despite reportedly being under pressure from trade lobby to allow its shipments.

In terms of dollar, pulses exports during April-January were up 73 per cent at \$476 million

India's pulses exports for the financial year will likely scale a new record on rising demand for chickpea and lentils from countries such as China, United Arab Emirates (UAE) and Bangladesh.

बिज़नेस स्टैंडर्ड

Last Updated- February 17, 2023 | 8:36 PM IST

भारत को दलहन उत्पादन में आत्मनिर्भर बनाने का वैश्विक महामंडल देश को दाल उत्पादन में आत्मनिर्भर बनाने के हल के लिए सरकार के साथ-साथ दलहन कारोबारी भी प्रयासरत है। भारतीय दलहन और अनाज संघ (आईपीजीए) ने दाल पल्स कॉन्क्लेव 2023 का आयोजन किया है।

तीन हदवसीय दलहन महाकुंभ में दाल उत्पादन करने वाले 20 देशों के प्रभूतहन्ध शाहमल हुए हैं। भारतीय दलहन कारोबारियों की कोहशाश जलवायुपररवतणन के प्रभाव और नई तकनीक की जानकारी के बल पर देश को दाल उत्पादन में आत्मनिर्भर बनाना है।

मुंबई में शुरू हुए तीन हदवसीय दाल पल्स कॉन्क्लेव 2023 की जानकारी देते हुए आईपीजीए के अध्यक्ष हबमल कोठारी कहते हैं कि दालों और अनाज उत्पादन पर जलवायुपररवतणन के प्रभूतकूल प्रभावों से निपटने पर हमारा ध्यान है।

भारतीय बाजार सहभागियों, भारत और हवदेश में सभी सहयोगियों के बीच अच्छे संबंधों को बढ़ावा देने का प्रयास है। दुहनयाभर के लोगों को पता है कि भारत में दालों के उत्पादन की असीम संभावनाएं हैं। उत्पादन बढ़ाने के हल की जा रही ररसचणमें हम लोग मदद कर रहे हैं। हमारा पूरा ध्यान दालों में देश को पूरी तरह से आत्मनिर्भर बनाने पर है।

इस सेहमनार में दुहनयाभर ररसचणवैज्ञानिक, खाद्य टेकनोलहजस्ट, प्रोसेसिंग के पहनयां व सेवा प्रदाताओं और संबंधित लोग शाहमल हुए हैं। जो दलहन फसलों की वतणमान स्थथहत, भववष के रुझान, व्यापार नीहतयों, स्थथरता और तकनीकी हवकास पर चचाणकरेंगे। भारत को आत्मनिर्भर बनाने और पोषण सुरक्षा को आगे बढ़ाने में सहायता करने के हल दाल सेक्टर का हवि का सबसे बड़ा आयोजन है।

कोठारी कहते हैं कि भारत में सभी तरह की दालों का सन 2022-23 में करीब 275 लाख टन उत्पादन किया गया है, जो अब तक का ररकॉर्ड है। हबमल कोठारी कहते हैं कि देश में पछले 10 सालों में दालों की खेती तेजी से बढ़ी है। ररकॉर्ड उत्पादन हुआ है लेकिन उसी तरह से मांग भी बढ़ी है।

हां, कुछ ऐसी दालें हैं, जिनका उत्पादन बढ़ाने की जरूरत है। देश में सभी तरह की दालों का कुल कारोबार करीब 2 लाख करोड़ रुपये के आसपास है। भारत के दाल के बाजार को 2026 तक 25 अरब अमेरिकी डॉलर तक पहुंचने की उम्मीद है और 2030 तक इसकी मांग में 330-350 लाख टन तक का इजाफा होगा।

दालों के मामले में देश आत्मनिर्भरता की ओर तेजी से आगे बढ़ रहा है। देश का हकसान चना और मूंग दालों का उत्पादन मांग से कम है, जबकि अरहर, मसूर और उड़द दालों की कमी बनी हुई है।

देश में अरहर दाल के उत्पादन और मांग में करीब 7 लाख टन का अंतर है, हजसे मसूर, मोजाहबक, तंजाहनया सहहत अन्य पूर्वी अफ्रीकी देशों से मंगाया जाता है। उड़द दाल की मांग और आपूर्ति में 5 लाख टन का अंतर है। मसूर की दाल में भी मांग और उत्पादन में 8 लाख टन का अंतर है। उड़द और मसूर दाल की मांग और आपूर्ति को एक करने के हल उत्पादन बढ़ाने पर जोर दे रही है।

हबमल कोठारी ने कहा कि हमारा मानना है कि दालों के मूल्य व हणत उत्पादों में अत्यधिक वृद्धि की क्षमता है जिसका भारत में उपयोग किया जा सकता है और यह हकसानों की आय बढ़ाने और पोषण सुरक्षा को आगे बढ़ाने के दोहरे लाभ प्रदान करने के हल एक लंबा रास्ता तय करेगा।

भारत दुहनया में दालों की व्यापक हकसानों का सबसे बड़ा उत्पादक, प्रोसेसर और उपभोक्ता है। हजसको देखते हुए पल्स कॉन्क्लेव 2023 में 20 से अधिक देशों के नवीनतम उत्पाद, प्रहक्रयाओं और उपकरणों का प्रदशणन किया गया है। हजसका फायदा भारतीय उत्पादकों को हमलेगा

कंज्यूमर अफेयर्स सेक्रेटरी ने कहा- सरकार अच्छे ट्रेडर्स के साथ, लेकिन दालों की जमाखोरी करने वालों पर करेंगे कार्रवाई

IPGA के Pulse Conclave 2023 में कंज्यूमर सेक्रेटरी ने दालों पर बयान देते हुए कहा कि दालों की कीमत पर सरकार की नजर बनी हुई है। ट्रेडर्स जमाखोरी न करें, अन्यथा उनके खिलाफ कार्रवाई होगी। उन्होंने कहा कि ट्रेडर्स सिस्टम के साथ खिलवाड़ न करें। सरकार अच्छे ट्रेडर्स के साथ है लेकिन सरकार द्वारा ट्रेडर्स के साथ-साथ लोगों के हितों का ध्यान रखना भी जरूरी होता है

Pulse Conclave 2023: IPGA के Pulse Conclave 2023 में कंज्यूमर अफेयर्स सेक्रेटरी ने बड़ा बयान दिया। अपने बयान में कंज्यूमर अफेयर्स सेक्रेटरी रोहित कुमार सिंह (Consumer Affairs Secretary Rohit Kumar Singh) ने सीधे ट्रेडर्स पर निशाना साधा। उन्होंने कहा कि सरकार अच्छे ट्रेडर्स के साथ है बशर्ते वो जमाखोरी न करें। जमाखोरी करके कीमतें न बढ़ाएं। उन्होंने स्पष्ट कहा कि जो भी अच्छे तरीके से ट्रेडिंग करेंगे उन्हें सरकार की तरफ से हर मुमकिन मदद मिलेगी। लेकिन जो भी जमाखोरी या कालाबाजारी करते हुए पाया जायेगा उसके खिलाफ सख्त कार्रवाई की जायेगी। उन्होंने कहा कि दालों की कीमतों पर सरकार की नजर है। लिहाजा ट्रेडर्स जमाखोरी करने से बचें।

कंज्यूमर सेक्रेटरी ने IPGA के Pulse Conclave 2023 में दालों पर बयान दिया। उन्होंने कहा कि दालों की कीमत पर सरकार की नजर बनी हुई है। ट्रेडर्स को हिदायत है "जमाखोरी न करें, अन्यथा कार्रवाई होगी"। उन्होंने कहा "ट्रेडर्स सिस्टम के साथ खिलवाड़ न करें।" हम अच्छे ट्रेडर्स के साथ हैं लेकिन "ट्रेडर्स के साथ-साथ लोगों के हितों का ध्यान रखना भी जरूरी है।"

इंडिया पल्सेस अँड ग्रेन्स असोसिएशन (आयप ज ए) नेकडधान्य क्षेत्रात ल जगात ल सवाभत मोठा कायभक्रम' द पल्सेस कॉन्क्लेव्ह २०२३' च्या सहाव्या आवृत्त चेयशस्व उद्घाटन इंडिया पल्सेस अँड ग्रेन्स असोसिएशन (आयप ज ए) नेकडधान्य क्षेत्रात ल जगात ल सवाभत मोठा कायभक्रम' द पल्सेस कॉन्क्लेव्ह २०२३' च्या सहाव्या आवृत्त चेयशस्व उद्घाटन • भारतात ल कडधान्य बाजार २०२६पर्यंत USD २५ नबनलयन पर्यंत पोहोचण्याच शक्यता आहे • भारताच मार्ग २०३० पर्यंत ३३-३५ दशलक्ष टनांच्या नदशेनेवाढ्ार आहे • भारताला स्वावलंब बनवण्यासाठी आनर् पोषर् सुरक्षेसाठी प्रगत करण्यात मदत करण्यासाठी कडधान्य क्षेत्रात ल जगात ल सवाभत मोठा कायभक्रम

१७ फेब्रुवारी २०२३: भारतीय कडधान्ये आणि धान्य क्षेत्राला जागतिक स्तरावर स्पर्धात्मक बनवण्याच्या आणि भारताची अन्न आणि पोषण सुरक्षा पुढे नेण्याच्या दृष्टीकोनातून साकार होण्याच्या दिशेने एक पाऊल म्हणून, इंडिया पल्सेस अँड ग्रेन्स असोसिएशन (आयपीजीए) ने आपल्या तीन दिवसीय मेगा ग्लोबल सिम्पोजियमचे मुंबईत 'द पल्सेस कॉन्क्लेव्ह २०२३' उद्घाटन केले.

प्रमोशनल एजन्सीज, संशोधन शास्त्रज्ञ, फूड टेक्नॉलॉजिस्ट, प्रोसेसिंग कंपनी, व्हॅल्यू चेन सहभागी, सेवा प्रदाते आणि इतर संबंधितांसह जगभरातील प्रमुख भागधारकांचा सहभाग होता, एका व्यासपीठावर सखोल वर्तमान स्थिती, भविष्य यावर चर्चा करण्यासाठी एकत्र आले. या महत्त्वाच्या क्षेत्रातील ट्रेंड, व्यापार धोरणे, टिकाऊपणा आणि तांत्रिक विकास यावर चर्चा झाली.

बिमल कोठारी, अध्यक्ष, इंडिया पल्सेस अँड ग्रेन्स असोसिएशन म्हणाले, "चांगल्या आणि शाश्वत उत्पन्नावर लक्ष केंद्रित करण्यासाठी आपण अनेक तंत्रज्ञान शोधण्यावर लक्ष केंद्रित केले पाहिजे. कारण आपण उत्पन्नात वाढ पाहू शकतो, तसेच वस्तूंच्या मागणीत वाढ करण्यासाठी आपल्याला शाश्वत धोरणांना प्रोत्साहन देणे आवश्यक आहे. डाळींसारख्या मुख्य अन्नधान्याच्या चांगल्या व्यापाराला प्रोत्साहन देणे. कडधान्य उद्योग वाढीव मागणी आणि वापरामुळे अनेक संधी उपलब्ध करून देतो. आम्ही आयपीजीए मध्ये डाळींच्या चांगल्या आयात आणि निर्यातीसाठी मुक्त व्यापार धोरणाचे समर्थन करतो. आयपीजीए विकासाभिमुख धोरणे आखण्यासाठी धोरण निर्मात्यांसोबत काम करण्यासाठी वचनबद्ध आहे. नेक्स्ट झेन स्टार्ट-अप आणि कृषी उद्योजकांचा सहभाग हे या कॉन्क्लेव्हचे मुख्य आकर्षण आहे."

पी.के. सिंह, कृषी आयुक्त, केंद्रीय कृषी आणि शेतकरी कल्याण मंत्रालय म्हणाले, "भारतीय कृषी उद्योग आगामी काळात उत्कृष्ट उत्पादन देण्यास तयार आहे. आमचा अंदाज सांगतो की २०२१-२२ मध्ये आपल्याकडे २६.६९ दशलक्ष टन डाळींचे उत्पादन झाले आहे. भारतातील लोकसंख्येपैकी एक तृतीयांश लोक शाकाहारी आहेत आणि ते त्यांच्या प्रथिनांची आवश्यकता पूर्ण करण्यासाठी कडधान्यांवर मोठ्या प्रमाणात अवलंबून असतात. अगदी मांसाहारी लोकांसाठीही कडधान्ये त्यांच्या दैनंदिन आहाराचा प्रमुख भाग बनतात. त्यामुळे दैनंदिन वापरामुळे डाळींचे उत्पादन अत्यंत आवश्यक आहे."

रोहित कुमार सिंग, आयएस, ग्राहक व्यवहार विभाग, भारत सरकारचे सचिव म्हणाले, "धोरण निर्माते म्हणून, योग्य व्यापार धोरणांद्वारे ग्राहक आणि उत्पादक यांच्या हितामध्ये समतोल राखणे हे आमचे प्राधान्य आहे. भारतातील डाळींचे उत्पादन काळानुसार वाढत आहे. ग्राहकांच्या हिताचे संरक्षण करण्यासाठी आणि व्यापार धोरणांच्या बाबतीत पारदर्शकता सुनिश्चित करण्यासाठी सातत्यपूर्ण धोरण असणे महत्त्वाचे आहे."

डेव्हिड मॅरिट, कृषी मंत्री, कॅनडाच्या सास्काचेवान प्रांत, म्हणाले, "पीक उत्पादनासाठी शाश्वतता हे आमचे सरकार आणि उद्योगाचे सर्वोच्च लक्ष आहे. २०२१ मध्ये एकूण उत्पादनात डाळींचा वाटा १६ टक्के असेल. कॅनडाचा निव्वळ कार्बन प्रतिस्पर्धापेक्षा जागतिक स्तरावर आउटपुट सर्वाधिक ५० टक्के कमी असेल. सर्वांना लाभ देणार्या बाजारपेठेतील स्थिरतेबाबत भारत मार्गदर्शन करत आहे हे पाहून आनंद होतो. कॅनडा आणि भारताने सर्वसमावेशक व्यापार जाहिरातींसाठी गेल्या वर्षी अधिकृतपणे पुन्हा चर्चा सुरू केली ही चांगली भावना आहे. हे लक्ष्यीकरण आणि स्थिरतेच्या दिशेने जोडलेल्या अनुक्रमांकडे नेईल."

पल्सेस कॉन्क्लेव्ह २०२३ ने नवीनतम उत्पादने, प्रक्रिया आणि उपकरणे प्रदर्शित केली. २० हून अधिक देशांतील शेकडो प्रतिनिधींना एकत्र आणून एक भव्य ज्ञान-सामायिकरण आणि नेटवर्किंग संधी निर्माण केली.

डेव्हिड मॅरिट, कृषी मंत्री, सास्काचेवान प्रांत, कॅनडा यांनी त्यांच्या शिष्टमंडळासह कॉन्क्लेव्हमध्ये सक्रिय सहभाग घेतला. याशिवाय, भारत ज्यांच्याशी व्यापार करतो अशा विविध देशांतील मोठ्या संख्येने कॉन्सुलर कॉर्प्स होते.

TPC २०२३ ने मोठ्या प्रोसेसर, ब्रँडेड प्लेअर्स, ट्रेडिंग हाऊस, व्यापार मध्यस्थ निर्यातदार, आयातदार, तसेच इंडेंटर्स, वेअरहाऊसिंग कंपन्या, कस्टम हाउस एजंट्स, शिपिंग कंपन्या इत्यादी सेवा प्रदाते यासह संपूर्ण मूल्य शृंखलेतील भागधारकांना आकर्षित केले. आमचा विश्वास आहे की, कडधान्यांच्या मूल्यवर्धित उत्पादनांमध्ये घातांकीय वाढीची क्षमता आहे ज्याचा उपयोग भारतात केला जाऊ शकतो आणि ते शेतकऱ्यांचे उत्पन्न वाढवणे आणि पोषण सुरक्षा वाढवण्याचे दुहेरी फायदे प्रदान करण्यासाठी खूप पुढे जाईल. देशभरातील ६०० हून अधिक प्रतिनिधी सहभागी होत आहेत.

अनेकांसाठी मुख्य अन्न असण्यासोबतच, अन्न प्रक्रिया उद्योगात कडधान्यांचा उपयोग आरोग्याबाबत जागरूक ग्राहकांसाठी सूप, सॉस, बेकरी उत्पादने, जेवण, स्नॅक्स आणि कन्फेक्शनरी उत्पादने बनवण्यामध्ये होतो. हेल्दी रेडी टू इट प्लांट-आधारित ग्लूटेन-फ्री स्नॅक खाद्यपदार्थ देशातील ग्राहकांमध्ये अधिक लोकप्रिय होत आहेत. कॉन्क्लेव्हमध्ये चर्चेसाठी महत्त्वाचा विषय हा कडधान्यांपासून बनवलेल्या वनस्पती-आधारित अन्न उत्पादनांचा होता कारण ते एक उदयोन्मुख क्षेत्र आहे ज्यामध्ये वेगाने वाढ होण्याची क्षमता आहे.

TPC २०२३ ही अनोख्या द्विवार्षिक कार्यक्रमाची ६वी आवृत्ती आहे आणि ती 'डाळी क्षेत्राची शाश्वतता' या विषयावर आधारित आहे कारण कडधान्ये आणि धान्य उत्पादनावरील हवामान बदलाच्या प्रतिकूल परिणामांना तोंड देणे हे त्याचे प्रमुख लक्ष आहे. TPC २०२३ भारतीय बाजारपेठेतील सहभागी आणि भारत आणि परदेशातील सर्व सहयोगी यांच्यात निरोगी संबंध वाढवण्याचा प्रयत्न करते.

Sixth India Pulses & Grains Association conclave 2023 inaugurated

and export of pulses."

Mumbai, Feb 18 (UNI) India Pulses and Grains Association (IPGA) inaugurated its 3-day mega global seminar 'The Pulses Conclave 2023' here on Saturday.

Bimal Kothari, Chairman, of India Pulses and Grains Association, said, "We must focus on exploring multiple technologies to focus on a better and sustainable yield. At IPGA we advocate free trade policy for better import

Govt keeping track of tur prices, don't want them to top ₹125

Updated - February 17, 2023 at 06:56 PM. | Mumbai

Speculation on social media pushing prices of agri commodities, says Consumer Affairs Dept Secretary

[BY SURESH P. IYENGAR](#)

The government expects tur prices to settle at the current level of ₹111 a kg

The government is keeping a close watch on run-away tur prices and willing to rein it in with stern action if prices do not settle at current level. Rohit Kumar Singh, Secretary, Department of Consumer Affairs said the government expects tur prices to settle at the current level (₹111 a kg) and is tracking it on a daily basis. "If it goes any further we will start taking action and definitely do not want it to touch ₹125-130," he said

Hello Entrepreneurs

World's largest event of the Pulses sector

India Pulses and Grains Association (IPGA) successfully inaugurated the Sixth edition of The Pulses Conclave 2023

Mumbai: As a step to realise its vision to make the Indian pulses and grains sector globally competitive and advance India's food and nutrition security, India Pulses and Grains Association (IPGA) inaugurated its 3-day mega global seminar 'The Pulses Conclave 2023' in Mumbai.

- India's Pulses Market likely to reach USD 25 Billion by 2026 India's demand set to race towards 33-35 million tonnes by 2030
- World's largest event of the Pulses sector to set the roadmap for making India self-sufficient and help advance Nutrition Security

The participation was witnessed from key stakeholders from around the world, including promotional agencies, research scientists, food technologists, processing companies, value chain participants, service providers and related others are expected to congregate on a single platform to discuss the current in-depth status, future trends, trade policies, sustainability and technological advances in this vital sector.

Bimal Kothari, Chairman of India Pulses and Grains Association, said, "We must focus on exploring multiple technologies to focus on a better and sustainable yield. As we can witness a rise in incomes, there is a simultaneous rise in commodity demand as well. To promote a better trade of staple diet cereals like pulses, we need to promote sustainable policies. The pulses industry provides end number of opportunities through boosted demands and consumption. At IPGA, we advocate free trade policy for better import and export of pulses.

IPGA is committed to working with policymakers to design growth-oriented policies. Participation of the next Zen start-ups and agriprenures are the highlight of this conclave”.

P. K. Singh, Agriculture Commissioner, Union Ministry of Agriculture and Farmers Welfare, “Indian agriculture industry is well versed to have a fantastic production in the coming time. Our estimates say we produced 26.69 million tons of Pulses in 2021 -22. In India, almost one-third of the population is vegetarian and heavily dependent on pulses to fulfil their protein requirements. Even for the non-vegetarian population, pulses form a major part of their daily diet. Thus pulses become highly essential in production as good consumption on a daily basis”.

Rohit Kumar Singh, IAS, Secretary, Department of Consumer Affairs, Government of India, said, “As policymakers, it has been our priority to maintain a balance through better trade policies between the interest of consumers and producers. India’s pulses production has been growing up with time. It is important to have a consistent policy to protect consumer interests and ensure transparency in terms of trade policies”. Date 18 Feb 2023 Name Hello Entrepreneur Link <https://helloentrepreneurs.com/business/worlds-largest-event-of-the-pulses-sector-16605/>

Hon’ble David Marit, Minister of Agriculture, Saskatchewan Province, Canada, said, “Sustainability is the largest focus for crop production for our government and industry. Pulses occupied 16 percent from the total production in 2021. Canada’s net carbon production is 50 percent lower than global competitors. We are pleased to see India guiding stability in the marketplace that benefits everyone. It was great to see Canada and India officially relaunch negotiations towards comprehensive trade agreements last year. This will lead towards mutually signed agreements towards aiming benefits and sustainability”.

The Pulses Conclave 2023 showcased the latest products, processes and equipment, bringing together several hundred delegates from over 20 countries to create a grand knowledge-sharing and networking opportunity. Hon’ble Mr. David Marit, Minister of Agriculture in Canada’s Saskatchewan province, actively participated in the Conclave along with his delegation. In addition, there were many consular corps from different countries with which India trades.

TPC 2023 attracted stakeholders across the entire value chain, including large Processors, branded Players, trading houses, trade Intermediaries Exporters, Importers, as well as service providers like Indenters, Warehousing Companies, Custom House Agents, Shipping Companies, and so on. We believe value-added products from Pulses have an exponential growth potential that can be harnessed in India, and it will go a long way to deliver twin benefits of augmenting farmers’ income and advancing nutrition security. Over 600 delegates across countries are participating.

In addition to being the staple food for many, Pulses find application in the food processing industry in making soups, sauces, bakery products, meals, snacks and confectionery products for health-conscious consumers. Healthy, ready-to-eat plant-based, gluten-free snack foods are becoming increasingly popular with consumers in the country. An important subject for discussion at the Conclave was plant-based food products from pulses, as it is an emerging sector having the potential to grow exponentially.

TPC 2023 is the 6th edition of the unique biennial event and is themed ‘Sustainability of Pulses Sector’ as its major focus is to tackle the adverse effects of climate change on pulses and grains production. TPC 2023 endeavours to foster healthy relations among Indian market participants and between India and all associates overseas.

About IPGA: India Pulses and Grains Association (IPGA), the nodal body for pulses and grains trade & industry in India, has over 400 direct and indirect members, which include individuals, corporates as well as Regional Pulses Traders and Processors Associations taking its pan-India reach to over 10,000 stakeholders involved in the farming, processing, warehousing, and import business of Pulses across the entire value chain.

IPGA’s vision is to make the Indian pulses and grains industry & trade globally competitive and in so doing, help advance India’s food and nutrition security. IPGA takes the onus of essaying a leadership role in the domestic agri-business and plays a more proactive role in the global domain to foster healthy relations among Indian market participants and between India and all associates overseas.

In addition, there was a large number of consular corps from different countries with which India trades. TPC 2023 attracted stakeholders across the entire value chain including large Processors, branded Players, trading houses, trade Intermediaries Exporters, Importers, as well as service providers like Indenters, Warehousing Companies, Custom House Agents, Shipping Companies, and so on. We believe, value-added products from Pulses have an exponential growth potential that can be harnessed in India, and it will go a long way to deliver twin benefits of augmenting farmers’ income and advancing nutrition security. Over 600 delegates across countries are participating. In addition to being the staple food for many, Pulses find application in the food processing industry in making soups, sauces, bakery products, meals, snacks and confectionery products for health-conscious consumers. Healthy ready-to-eat plant-based gluten-free snack foods are becoming increasingly popular with consumers in the country. An important subject for discussion at the Conclave was plant-based food products from pulses as it is an emerging sector having the potential to grow exponentially. TPC 2023 is the 6th edition of the unique biennial event and is themed ‘Sustainability of Pulses Sector’ as its major focus is to tackle the adverse effects of climate change on pulses and grains production. TPC 2023 endeavours to foster healthy relations among Indian market participants and between India and all associates overseas.

IPGA successfully inaugurates the Sixth edition of The Pulses Conclave 2023

February 18, 2023 Rekha Nair Business Comments Offon IPGA successfully inaugurates the Sixth edition of The Pulses Conclave 2023

Mumbai... February 2023....As a step to realise its vision to make the Indian pulses and grains sector globally competitive and advance India's food and nutrition security, India Pulses and Grains Association (IPGA) inaugurated its 3-day mega global seminar 'The Pulses Conclave 2023' in Mumbai.

The participation was witnessed from key stakeholders from around the world including promotional agencies, research scientists, food technologists, processing companies, value chain participants, service providers and related others are expected to congregate on a single platform to discuss in-depth current status, future trends, trade policies, sustainability and technological advances in this vital sector.

Bimal Kothari, Chairman, of India Pulses and Grains Association, said, "We must focus on exploring multiple technologies to focus on a better and sustainable yield. As we can witness a rise in incomes there is a simultaneous rise in demand for commodities as well. For promoting a better trade of staple diet cereals like pulses we need to promote sustainable policies. The pulses industry provides end number of opportunities through boosted demands and consumption. At IPGA we advocate free trade policy for better import and export of pulses. IPGA is committed to work with the policy makers for designing growth-oriented policies. Participation of next Zen start-ups and agriprenures are the highlight of this conclave".

P. K. Singh, Agriculture Commissioner, Union Ministry of Agriculture and Farmers Welfare, “Indian agriculture industry is well versed to have a fantastic production in the coming time. Our estimates say we had a production of 26.69 million tons of Pulses in 2021-22. In India almost one-third of the population is vegetarian and they are heavily dependent on pulses for fulfilling their protein requirements. Even for the nonvegetarian population, pulses form a major part in their daily diet. Thus pulses become highly essential in production as good consumption on daily basis”.

Hon’ble David Marit, Minister of Agriculture, Saskatchewan Province, Canada, said, “Sustainability is the largest focus for crop production for our government and industry. Pulses occupy 16 percent from the total production in 2021. Canada’s net carbon production is 50 percent lower than global competitors. We are pleased to see India providing guidance regarding stability in the marketplace that benefits everyone. It is great to see Canada and India officially relaunch negotiations towards comprehensive trade agreements last year. This will lead towards mutually signed agreements towards aiming benefits and sustainability”.

The Pulses Conclave 2023 showcased the latest products, processes and equipment, bringing together several hundred delegates from over 20 countries to create a grand knowledge-sharing and networking opportunity Hon’ble Mr. David Marit, Minister of Agriculture in Canada’s Saskatchewan province actively participated in the Conclave along with his delegation. In addition, there was a large number of consular corps from different countries with which India trades. TPC 2023 attracted stakeholders across the entire value chain including large Processors, branded Players, trading houses, trade Intermediaries Exporters, Importers, as well as service providers like Indenters, Warehousing Companies, Custom House Agents, Shipping Companies, and so on. Pulses Conclave Mumbai, Hope Of New Transformation

With Ease In Pulses Trade Policies India Can Develop A Comprehensive Trading System? Click To Know More Watch The Live Conversation

Mumbai- Pulses conclave was held at the Grand Hyatt Mumbai in a three-day conclave programme from 16 Feb to 18 Feb 2023, an initiative of Indian Pulses and Grain Association. The participation of various countries like Canada, Brazil, Myanmar Etc were present along with the policy makers from Government Of India like the Secretary Mr Rohit Kumar Singh, department of consumer affairs, Agriculture Commissioner PK Singh GOI and Mr Bimal Kothari IPGA Chairman who shared their thoughts on the current policy changes in India which are working on the requirements of Indian Farmers, Stake holders and end users who are the consumers. As during the course of time India-Canada trade partnerships in the agriculturebased products like pulses have increased which was also talked about by the Mr David Marit the agriculture Minister from Canada and the High Commissioner Mr Cameron Mackey at the conclave in Mumbai. As pulses is seen as an alternative source of protein so its export and import is very important for the world economy and India. With India hosting G 20 presidency this year ie. 2023 the policies related to the pulses trade and ease of doing business is much discussed in order to attract the global investors. मुंबई

देशात डाळींचा खप वाढला

मुंबई, ता. १७ : विविध कारणांमुळे देशातील डाळींचा आणि कडधान्यांचा खप वाढला असून आपले उत्पादन त्यापेक्षा किंचित कमी आहे. तरीही आपल्याला परदेशातून सुरळीत पुरवठा होईल. किमती स्थिर राहण्यासाठी आम्ही कारवाई देखील करू, असा इशारा केंद्रीय ग्राहक व्यवहार खात्याचे सचिव रोहित कुमार सिंह यांनी येथे दिला. मुंबईत गुरुवारपासून (ता.१६) सुरू झालेल्या तीन दिवसीय आंतरराष्ट्रीय डाळ व कडधान्य परिषदेत ते बोलत होते.

देशात डाळी व कडधान्य यांचे उत्पादन दरवर्षी पावणेतीन कोटी टनांच्या आसपास होते. तर त्यांचा खप वार्षिक तीन टनांच्या आसपास आहे. दक्षिण आफ्रिका, म्यानमार येथून उडीद व तूर डाळीची आयात करण्याची चर्चा सुरू असून तेथून आपल्याला सुरळीत पुरवठा होईल, असा विश्वासही त्यांनी व्यक्त केला. सध्या देशातील गरिबीचे प्रमाण कमी झाले असून लोकांच्या खाद्यविषयक सवयी बदलल्या आहेत. त्यामुळे मांसाहाराकडून लोक प्रथिनांसाठी डाळींकडे वळत आहेत. लोकसंख्या वाढ आणि उत्पादन वाढही झाल्यामुळे देशात डाळींचा खप मोठ्या प्रमाणावर वाढला आहे, असेही सिंह म्हणाले.

मात्र, डाळींच्या साठ्याबाबत केंद्राने अचानक निर्णय घेतल्यास त्यांच्या दरांबाबत अस्थिरता निर्माण होईल. त्यामुळे आम्ही तसे करत नाही. आम्ही आवश्यक वस्तू कायद्यानुसार साठा किती असावा याबाबत व्यापारांकडे विचारणा करतो. जास्त साठा ठेवू नका, असा इशारा प्रथम व्यापारांना देतो. त्यानंतरही किमती स्थिर झाल्या नाहीत तर कारवाई करतो. त्यासाठी गोदामांना मैत्रीपूर्ण भेटीही दिल्या जातात. आम्ही अशी कारवाई कधीही करू शकतो, मात्र यावर्षी ती वेळ आली नाही, असेही सचिव म्हणाले.

लोकायत्ता

डाळींच्या आयातीमध्ये शेतकरी-ग्राहक हिताचा सुवर्णमध्य साधणार?

मुंबई येथे नुकतीच इंडिया पल्सेस अँड ग्रेन्स असोसिएशनची (आयपीजीए) जागतिक दर्जाची 'द पल्सेस कॉन्क्लेव्ह २०२३' पार पडली. या कॉन्क्लेव्हमध्ये अनेक देशांचे राजदूत, वाणिज्य दूत आणि व्यापारी, व्यापारी संघटनांचे प्रतिनिधी आणि प्रक्रिया उद्योगाशी संबंधित जाणकार सहभागी झाले होते. काय घडले या परिषदेत?

डाळींच्या आयातीमध्ये शेतकरी-ग्राहक हहताचा सुवर्णमध्य साधणार? (Image Courtesy – Financial Express) भारतीय कडधान्ये आहण धान्य क्षेत्राला जागहतक स्तरावर स्पधानत्मक बनवण्यासाठी आहण भारताची अन्न सुरक्षा अहधक मजबूत करण्याच्या दृहिकोनातून इंडया पल्सेस अँड ग्रेन्स असोहसएशनने(आयपीजीए) १६, १७ आहण १८ फे ब्रुवारी या काळात जागहतक पररषदेचेआयोजन मुंबईत के लेहोते. अन्न सुरक्षेला प्राधान्य देत, शेतकरी आहण ग्राहकांच्या हहताचा सुवर्णमध्य साधून डाळीं बाबतच्या आयातीचा हनणणय घेतला जाईल, असा सूर इथेउमटला. डाळी आहण धान्यांच्या खरेदी- हवक्री संबंधत संथथा, शास्त्रज्ञ, अन्न प्रहक्रया तंत्रज्ञ, प्रहक्रया उद्योजक, मूल्यवधणन करणाऱ्या साखळीतील संथथा, म्ानमार, कॅ नडा आहण मॉझेहबकसह अन्य आहफ्रकी देशाचेराजदू त, वाहणज्य दू त, त्या-त्या देशातील व्यापारी संथथांचेप्रहहतनधी सहभागी झालेहोते. जागहतक डाळी आहण अन्नधान्यांची बाजारपेठ, उत्पादनाची स्थथती आहण खाद्यान्न म्हणून वापराबाबत एका व्यासपीठावर सखोल चचाण करण्यासाठी स्थथती आहण भहवष्यातील धोरणेठरहवण्यासाठी या पररषदेत प्रदीघणचचाण झाली.

मुंबईत डाळी परिषदेचं आयोजन
